Recruiting Manager
Software Engineering Internship Team
Google
1600 Amphitheatre Parkway
Mountain View, CA 94043

Dear Recruiting Manager,

I am writing to apply for the Software Engineering Internship at Google. I am currently pursuing a Bachelor's of Science in Computer Science at the University of Central Florida, with a GPA of 3.92. I am eager to deepen my understanding of core software engineering principles, Python and contribute to Google's innovative projects. My strong skills in Java, JavaScript, and C, along with my problem-solving abilities, will allow me to make valuable contributions to Google's engineering team.

I am particularly drawn to this internship because it will allow me to focus on software development, working on challenging projects that push the boundaries of technology. I am excited to apply my experience in designing and implementing efficient algorithms and my work in systems-level programming. My prior experience developing high-quality code, such as creating and debugging custom "Minecraft" plugins as a Freelance Developer at Orbital Studios, will allow me to contribute to Google's mission of solving complex technical challenges.

During my time at Orbital Studios, I developed solutions to optimize performance and enhance user experience, managing multiple projects simultaneously and consistently delivering code on time. This role helped me refine my ability to write efficient, maintainable code while adapting to different technical requirements. I am confident that these skills will be particularly valuable at Google, where collaboration and technical expertise are key.

As a Software Engineering Intern at Google, I am excited about the opportunity to work on groundbreaking projects that will advance my knowledge and skills in software engineering. I am confident that my technical background, problem-solving capabilities, and passion for coding will make me a strong asset to your team. I would welcome the opportunity to discuss my qualifications further. Please feel free to contact me at marmoragustin@gmail.com or (407) 967-3884. Thank you for your time and consideration.

Sincerely,
Agustin Marmor
